

Akkim is an organization that adopts the mission of adding value to life with chemistry.

It meets all the conditions of the ISO 14001:2015 Environmental Management System (EMS) standard. All the items within the scope are defined in all processes of the relevant locations and are valid for all products and services, depending on the internal/external party expectations and conditions. When Akkim takes part in projects within the scope of project engineering activities (engineering project/turnkey), all the conditions of the Environmental Management System are also valid for the business address where the project is carried out.

- Akkim Head Office: Gümüşsuyu Mah. Miralay Şefik Bey Sok. Akhan No:15 34437 Gümüşsuyu/İstanbul
- Akkim Yalova Inorganic Facilities: Merkez Mahallesi Akkim Sokak No:7 Taşköprü, Çiftlikköy/Yalova
- Akkim Yalova Organic Facilities: Merkez Mahallesi Süleyman Sevim Caddesi No:10 Taşköprü, Çiftlikköy/Yalova
- Akkim Nazilli Facilities: Nazilli OSB Mahallesi OSB 7. Caddesi No:2,3 Nazilli/Aydın

Our processes within the scope of the EMS established in our campuses below;

- 1- Akkim Yalova Inorganic Facilities: Design, manufacturing of sodium metabisulphite, sodium thiosulfate, polyalluminum chloride hydroxide, polyalluminum chloride hydroxytsulphate, trimethylaminhydro chloride, dimethylamine hydrochloride, monocloro acetic acid, Iron 3 chloride, chlor, hydrochloric acid, sodiumhypoclorite, sodiumhydroxide, hydrogen peroxide, sodiumpercarbonate, chloral alkali, esbo, sodiumpersulphate, ammonium persulphate, potassium persulphate, ultrafiltration membrane sales of acetic acid, sodium hydroxide and textile auxiliary chemicals provided from trackable sources, periodic control of transportable chlorine gas cylinders, engineering and project activities, research and development activities, storage, human resources, import, export, transit, customs, foreign trade, production, logistics, management and administrative organization activities
- 2- Akkim Yalova Organic Facilities: Manufacturing of monomethylamine, trimethylamine, dimethylacetamide, dimethylformamide, carbonmonoxide and hydrogen, aceticacide, dimethylmethylamine, textile and paper auxiliary materials, water and construction chemicals, plastic additives, customs, foreign trade, logistics, management and administrative organization activities
- 3- Akkim Head Office: Purchasing, import, export, sales accounting, finance, customs, foreign trade, management and administrative organization
- 4- Akkim Nazilli Facilities: Carboxymethyl cellulose (CMC) and Polyanionic cellulose (PAC) research and development activities, production, storage, purchase, customs, import, export, foreign trade, logistics, management and administrative organization.
